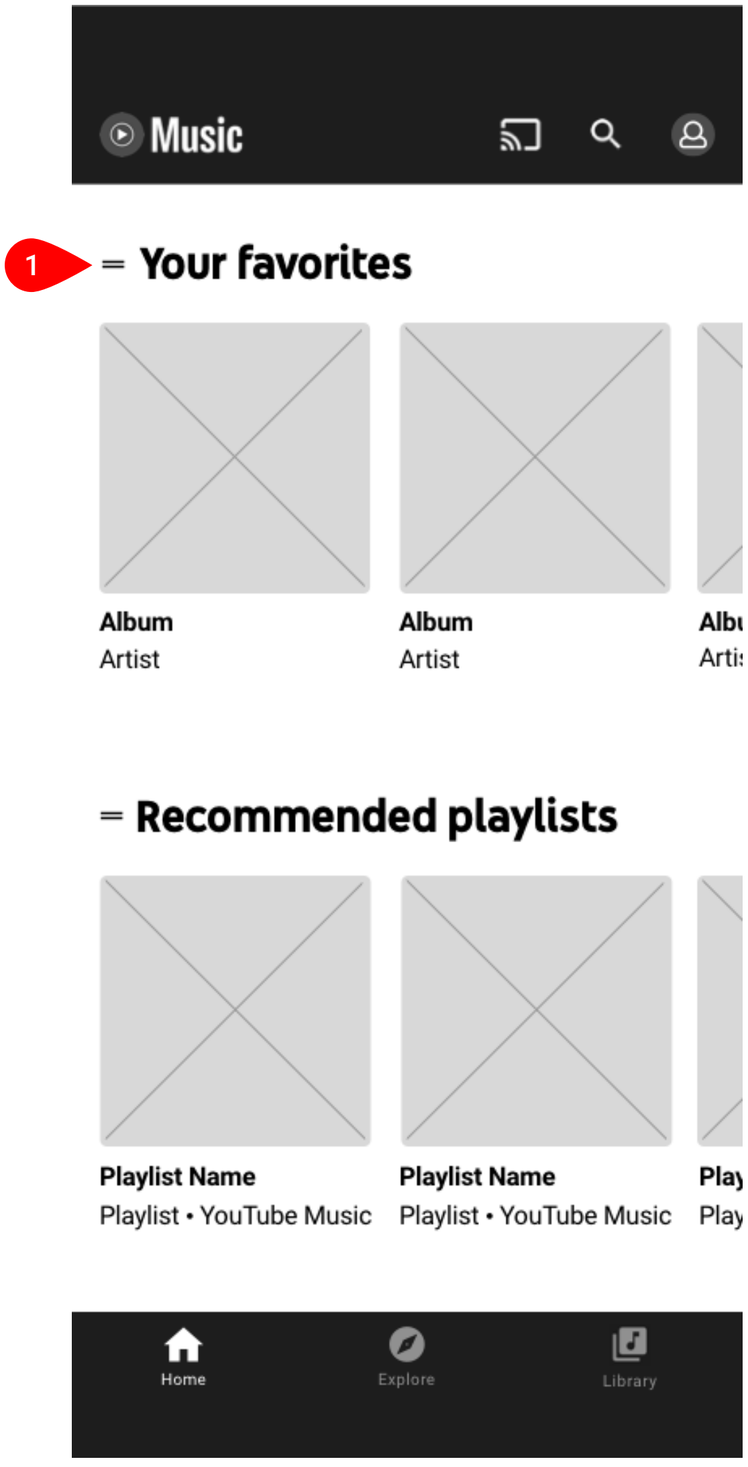
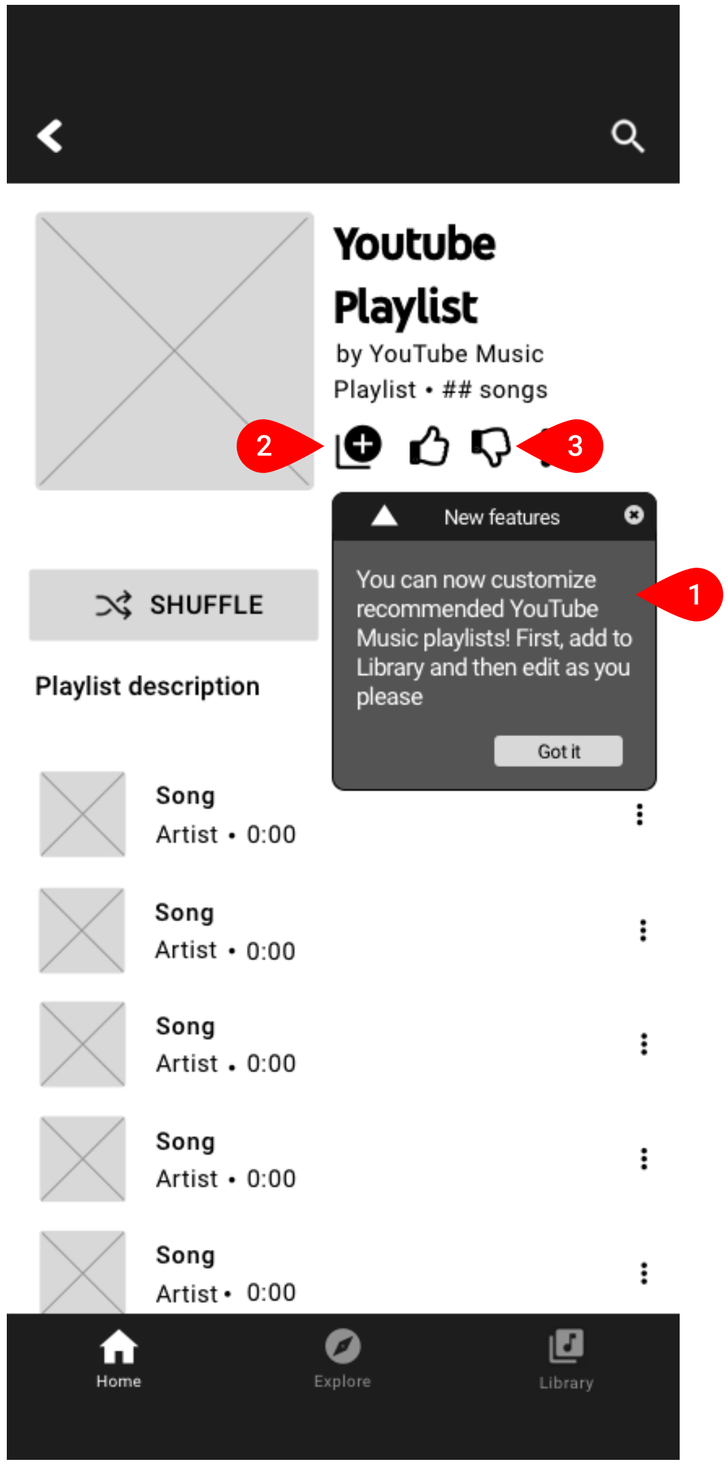
Annotated Homepage



1 New Feature: moveable Home screen. Users click and hold to activate function, then drag sections up or down to reorder their Home screen.

Annotated YouTube Playlist

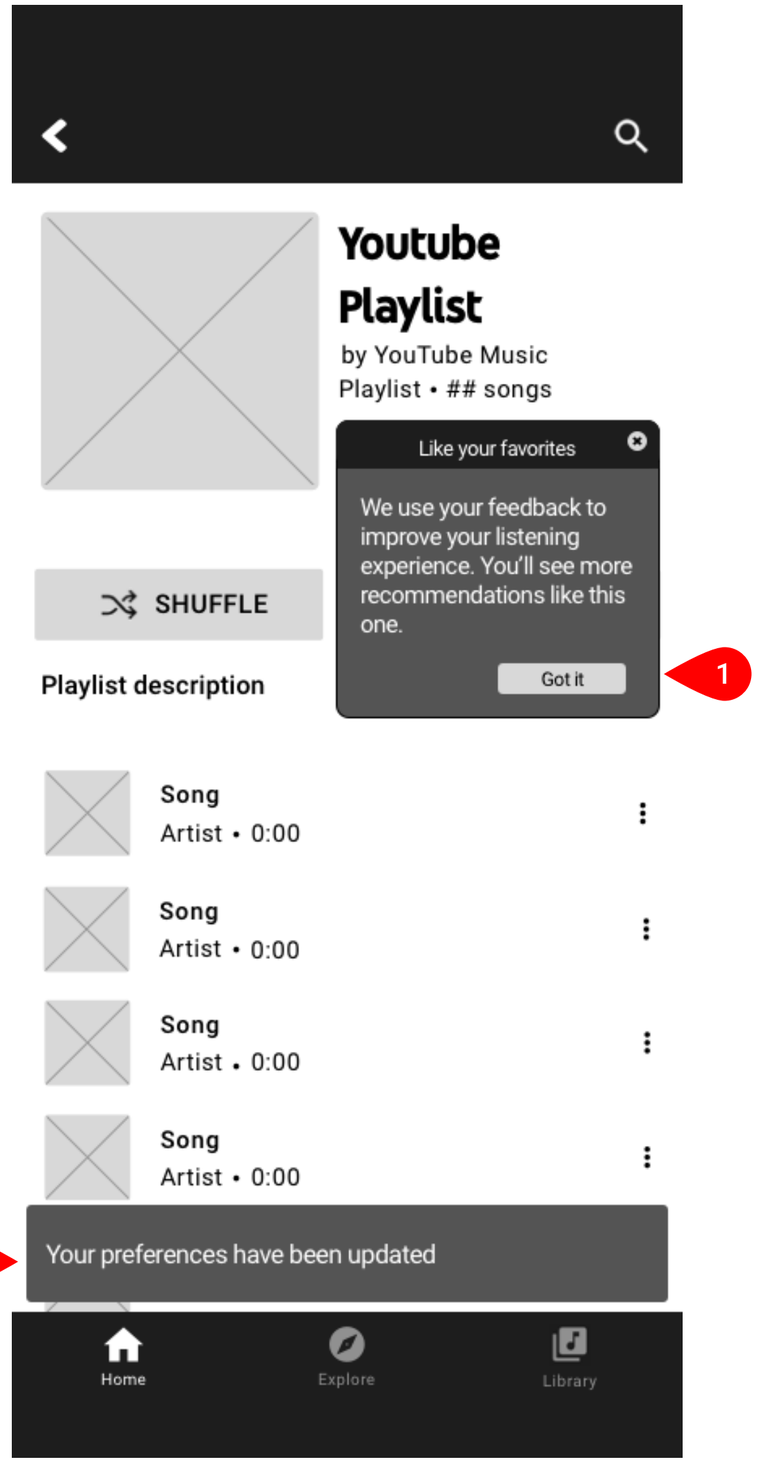


1. Onboarding: automatic pop-up first time a YouTube playlist is accessed after introduction of New Feature.

2. Add Button New Function: Instead of the former straight add functionality, selecting this on a curated playlist now adds an editable copy to the User's Library. Action: clicking takes you immediately to the editable copy.

3. Thumbs Up/Down: these new features update the User's preferences for more accurate recommendations.

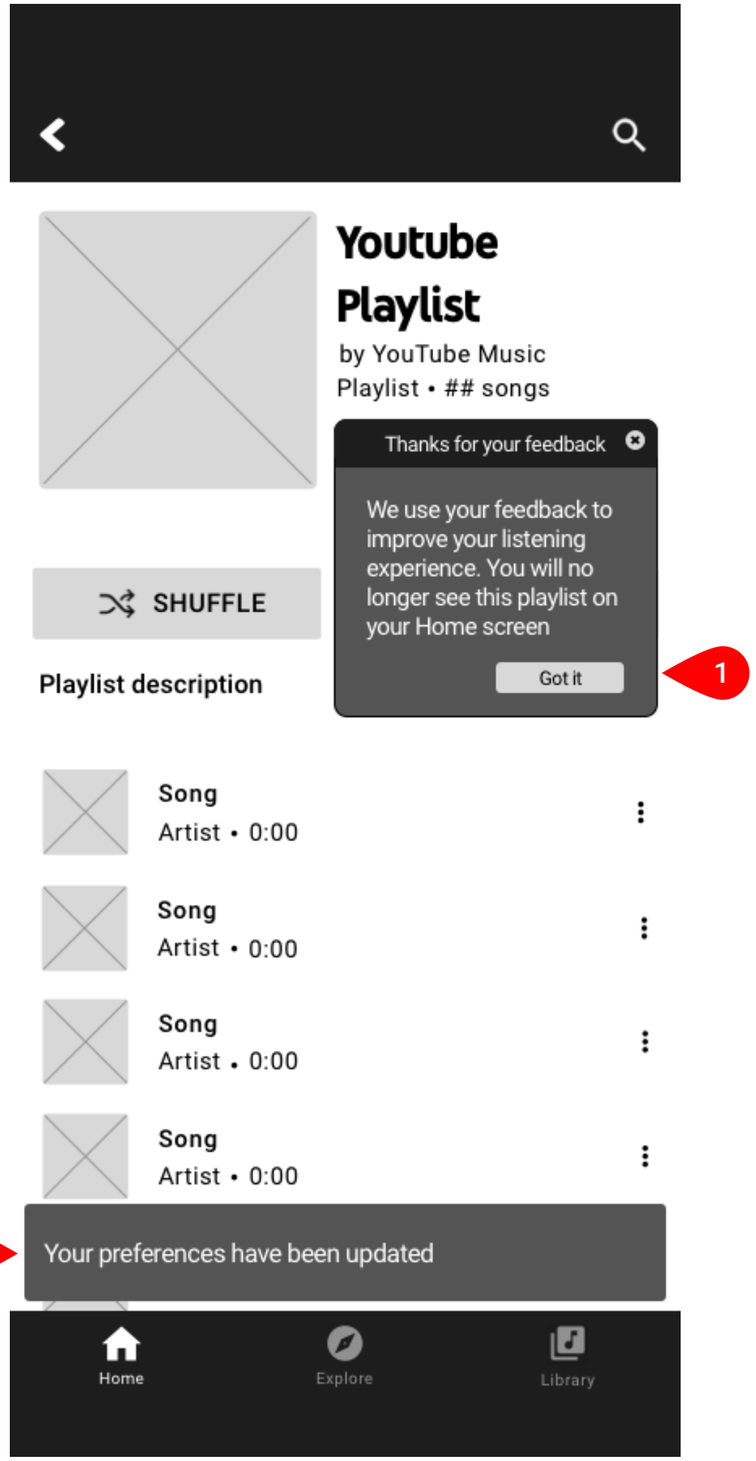
Annotated Playlist Liked



1. Thumbs-Up selected. First time use triggers benefit-oriented onboarding tutorial.

2. Confirmation bar gives feedback to the User verifying their thumbs-up was noted and their preferences updated.

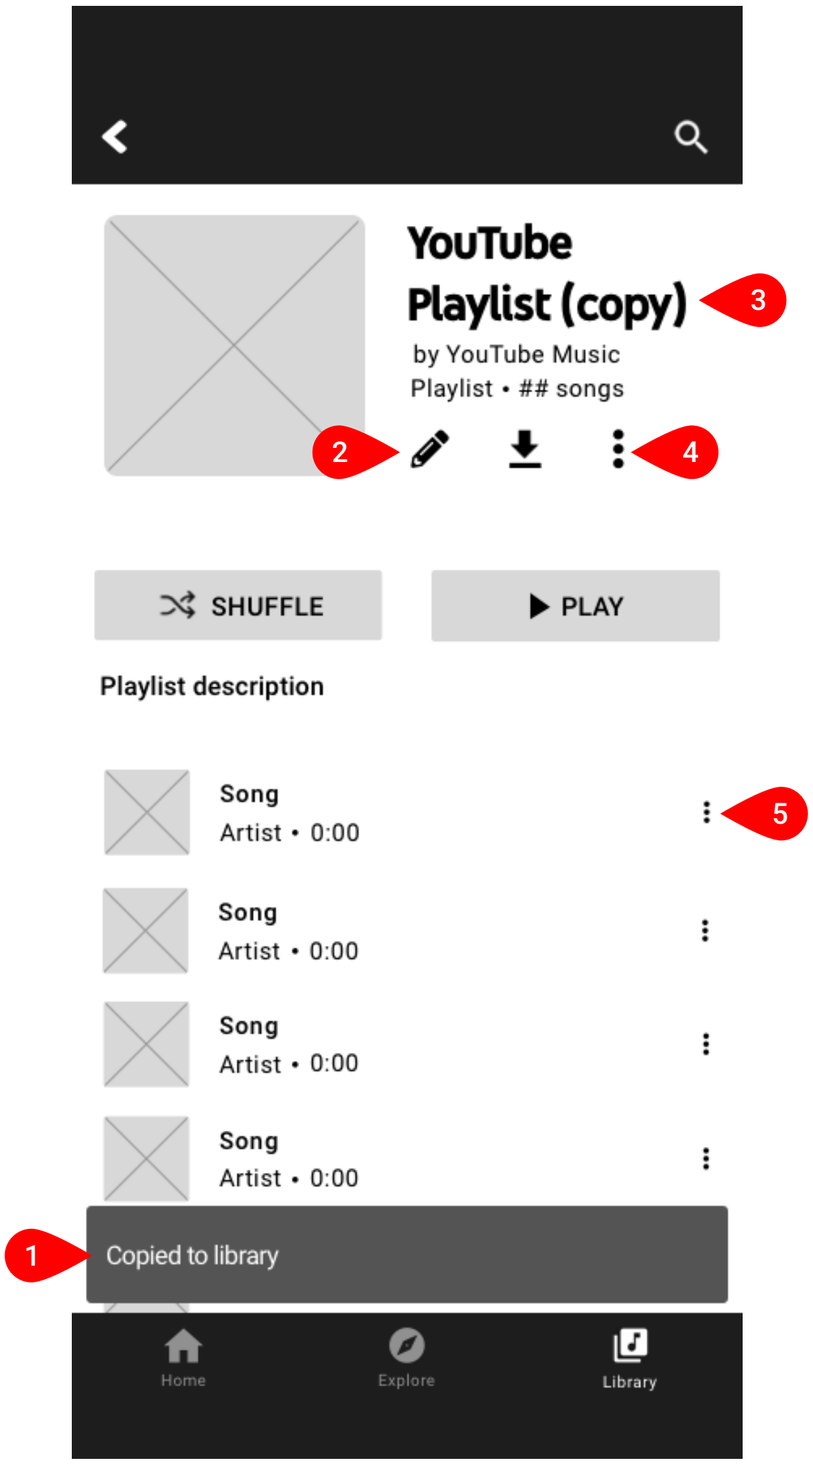
Annotated Playlist Disliked



1. Thumbs-Down selected. First time use triggers benefit-oriented onboarding tutorial.

2. Confirmation bar gives feedback to the User verifying that their thumbs-down was noted and their preferences updated.

Annotated YouTube Playlist (Copy)



1. Transported from Add function on YouTube Playlist screen. Confirmation bar gives feedback to the User that the action of copying the YouTube Playlist to Library was completed. Timed: 1500ms

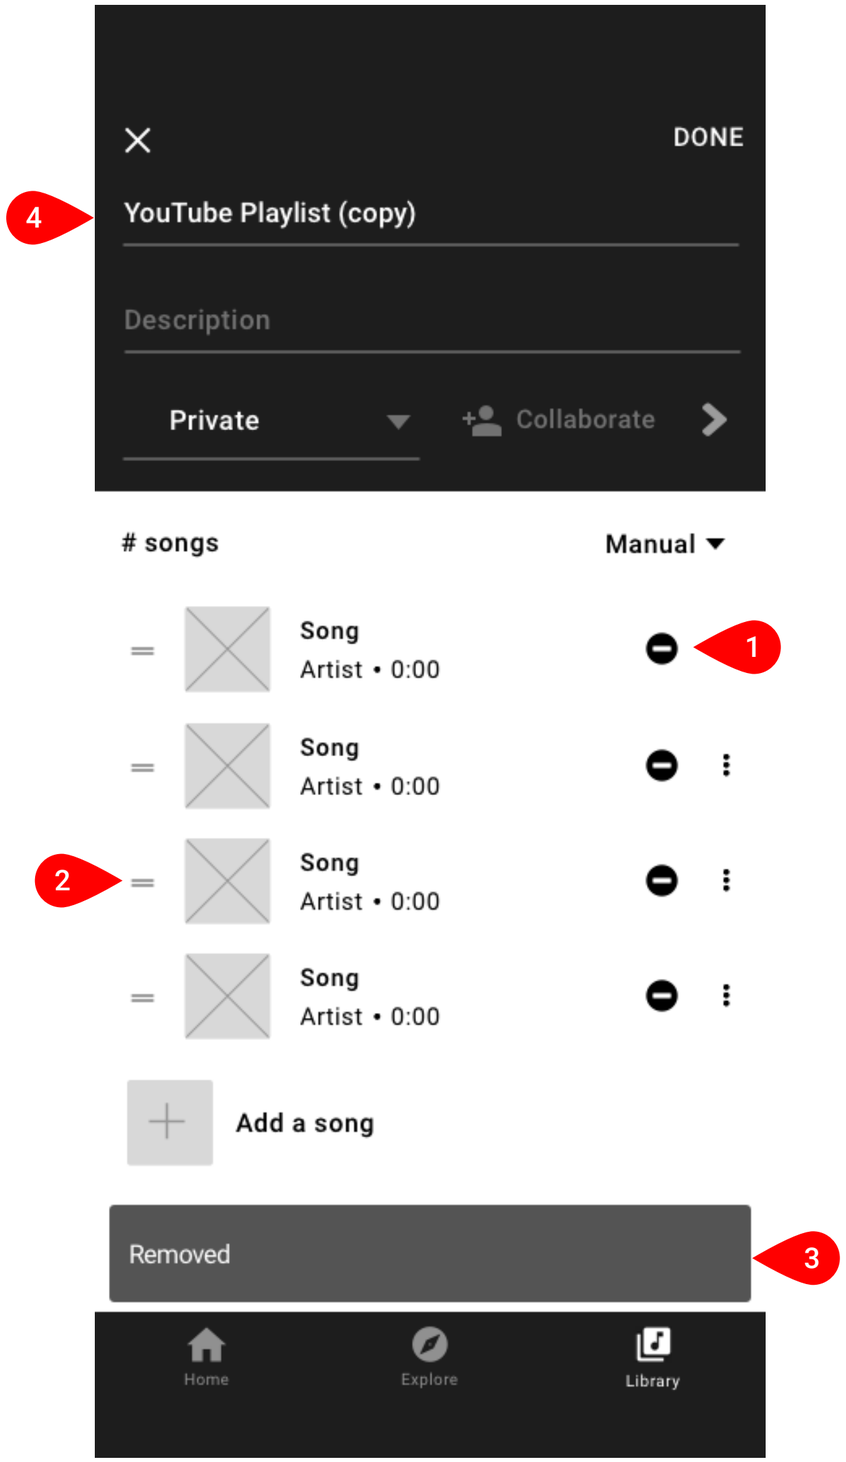
2. Edit Icon: new function allowing Users to edit the copy of the YouTube Playlist. Function can also found in 3-dot menu as is customary. Leads to Edit Playlist screen.

3. Default playlist name indicates that it is a Copy. Can be renamed by User on Edit Playlist screen.

4. Playlist 3-dot menu also includes Edit function which takes user to Edit Playlist Screen.

5. Song 3-dot menu also allows users to Remove Song from Playlist.

Annotated Edit Playlist



1. Minus Button: delete a song from Playlist. Triggers confirmation bar when completed.

2. Moveable Icon: songs can be reordered by clicking and dragging.

3. Confirmation bar gives feedback to the User that the action of removing a song was completed. Timed: 1500ms

4. Playlist name defaults as Original Name (copy) and can now be changed by the User.
